DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, the phrase "the shape of the letter" lacks antecedent basis.

In claim 1, line 10, the phrase "the side parts" lacks antecedent basis.

In claim 1, line 14, the phrase "temple-to-temple" lacks antecedent basis.

In claim 1, line 14, it is unclear if the applicant is positively claming the person's head. In addition, the "temple-to-temple" width is indefinite because this width is different from one person to another person. For instance, a child width is smaller that an adult's width.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toth et al., U. S. Patent 3,440,750 in view of Lindheim, U. S. Patent 1,245,475. Toth teaches a characters constructed of plastic foam such polyethylene foam cut or molded into various desired shapes such as the letter "A" (24). The characters 2 may be made with surfaces having different colors. Toth does not teach the foam letter "M". Lindheim

Application/Control Number: 09/669,150

Art Unit: 3611

.....

teaches a plurality of characters 2 in the shape of the letter of the alphabet (2). Specifically Lindheim teaches the letter "M" having a "v" shaped central portion and side legs extending down from the upper distal end of the central portion, whereby the leg extend below the lower portion of the "v". It would have been obvious to one having ordinary skill in the art a the time this invention was made to construct the character of the device taught by Toth in the shape "M" taught by Lindheim to provide a means of displaying the letter "M" on the board.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foam Bath Stickers, page 12, Lilly's Kids catalog, 1996. is cited to show foam letters.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cassandra Davis whose telephone number is 703-308-2223. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Johnson can be reached on 703-308-0558. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-2168.
